LEADERS IN WET FRICTION PRODUCTS

Industrial Brake have been supplying the Earthmoving sector worldwide with high quality aftermarket parts since 1998. We are leaders in the procurement of quality wet and dry friction products and have built a reputation of service excellence. We provide the highest quality spare parts with an unwavering commitment to customer satisfaction and peace of mind across the country and worldwide.

We are authorised distributors for HIDURAX in Japan who are OEM to many large equipment manufacturers, as well as FMC – a well-known worldwide brand. This gives us direct access to technical product support as well as to research and development departments. As we import directly from these manufacturers, we are able to supply friction products at a fraction of the price of OEM's saving our customers thousands in service costs.

LOCAL PRESENCE

Established in Perth, Western Australia, Industrial Brake is conveniently located close to major industrial hubs and transport routes enabling us to provide prompt service and delivery of goods. Our Belmont warehouse is staffed and fully stocked with a wide range of friction product ready for packing and dispatch to any location worldwide.

LATEST PRODUCTS

Industrial Brake is at the forefront of ever-changing friction disc technologies. There have been many advances in friction materials over the years, from sintered bronze to advanced compact carbons, we take a leadership role in the procurement of the latest friction materials available today ensuring that our products are guaranteed OE quality or better.

CUSTOMERS

Our customer base is made up of many large contracting and mining companies across Australia and Internationally.
